ONLINE: Flipping Classrooms

“I have a better understanding of how and why the flipped classroom should be used.”

– Cynthia A.

Harness technology to enhance students’ learning by examining successful strategies to “flip” classrooms. The flipped classroom approach prioritizes students’ needs beyond traditional teaching styles, while challenging teachers to employ innovative instructional methods.

Students are encouraged to take responsibility for their own knowledge acquisition by watching lesson videos on their own time and coming to class equipped to build upon their understanding of the concepts presented.

The resources, examples and templates presented in this course help teachers to plan and create efficient flipped classrooms. Educators are shown how to integrate content while collaborating effectively with students, co-workers and school leaders.

Standards:

This course aligns to the INTASC Standards including Learner Development, Learning Differences, Learning Environments, Content Knowledge, Application of Content, Planning for Instruction and Instructional Strategies.

It also aligns to the McRel Teacher Evaluation Standards including Teacher Leadership, Diverse Learners, Teachers Know Content and Teachers Facilitate Learning.

Each online self-study course from Professional Learning Board includes:

- **Convenient access** anytime, anywhere, any device
- Interactive **online** textbook
- Implement **practical resources and tools** in your classroom
- Demonstrate comprehension with **quizzes** and checks for understanding
- Align with your **Professional Learning Plan**
- Print, email and save your **Certificates of Completion**

Course Outline

LESSON 1: Understanding the flipped classroom

- Flipped classroom: Definition
- Why “Flip?”
- Key elements to flipping a classroom
- Benefits of flipping a classroom
- Traditional classroom vs. Flipped classroom
- Types of Flipped classrooms
- Flipped Learning
- Theoretical framework
- Research about flipped classrooms
- Concerns regarding flipped classrooms

LESSON 2: Creating a Flipped Classroom

- Key questions
- How to flip the classroom
- Creating a flipped lesson plan
- Effective lesson planning
- Integration within a flipped classroom

LESSON 3: Tools for the Flipped Classroom

- Creating video content
- The latest technology for creating videos
- Digital tools for flipping
- Tips for Effective Videos

LESSON 4: Ideas, Tips and Collaboration

- Accommodating all learners
- Collaboration between students
- Peer Instruction
- Collaborating with parents
- Collaborating with the school
- Flipping faculty meetings
- Collaborating online
- Flipping across grade levels
