It is increasingly essential for educators to develop students who not only are critical thinkers but innovators as well. This course provides a real-world approach to learning and teaching.

The first section brings together four major disciplines into one cohesive system: Science, Technology, Engineering, and Mathematics.

The second section focuses on applying mathematical standards and principles in everyday life.

The third section introduces the concept of student centered learning in their classrooms. This learning approach allows teachers to customize and differentiate curriculum for each student.
